

ENWORK

LIGOURI PRIVATE OFFICE

Captivating from Every Direction

Simple and light-scale, Ligouri (pronounced Li-gor-E) draws inspiration from natural materials and the principles of modernist design. Each piece blends clean lines with functional simplicity: a language of design that resonates with the contemporary workspaces of today. As a result, Ligouri is a timeless collection of understated elegance that uplifts the private office from every perspective.

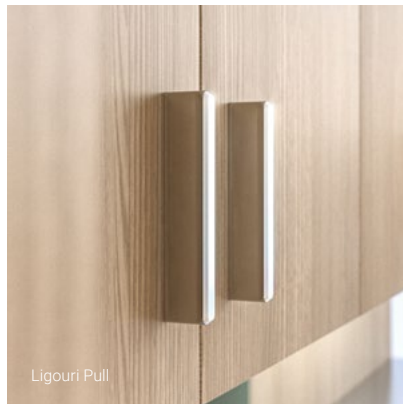

Floating Cabinet Surface

We take pride in designing inviting workspaces that weave together diverse materials in innovative and inspiring ways. We view each piece as an opportunity to engage the senses, highlighting the beauty that clean lines and subtle connection points can bring to a space.

Beautifully formed wraparound frame details combined with thin-profile quartz cabinet tops set the tone for an elegant art form. This interplay of details delivers a light, welcoming blend of work and storage layers that reflect our vision for balancing beauty, comfort, and performance.

Wraparound Frame

Beauty in Honest Materials

Ligouri embraces an honest beauty: furniture pieces that balance the inviting warmth of solid wood with the sleek allure of cast aluminum. This harmony between elements delivers rich hues of color and captivating focal points. A careful fusion of natural materials that reveals how simplicity in silhouette often leads to the finest designs.

Crafting the Ideal Space

The office can be a place where individuality is celebrated — a place where every detail is meticulously crafted around the importance of people and enhancing the user experience.

Height-adjustable desk, robust storage, and dimmable LED lighting beautifully integrate into a complete office solution, where unique details, like a levitating top and custom chamfered pulls, tell a tale of understated design.

Left: Overlay Desk, Laminate Modesty Panel, Lateral Drawer Credenza Cabinet, Whiteboard, Overhead Laminate Sliding Door with Open Cubby | Top: Height-Adjustable Return, Overhead Acrylic and Laminate Sliding Doors | Bottom: Overlay Desk, Cubby/File Ped Credenza Cabinet, Laminate Display Wall, Fabric Tackboard, Stack-On Storage

Ligouri offices come to life through layered materials and thoughtful details. Tackable surfaces and glass for writing encourage brainstorming and visual presentations. Coordinated shelving serves as a canvas to display office artifacts, expressing the unique personality of each environment.

This is how we shape dynamic workspaces. With a refined aesthetic and diverse range of configurations, Ligouri enables individuals to focus, connect, and thrive in their work.

User Experience Matters

Ligouri creates office spaces that are as unique as the individuals who work there — spaces that reflect company culture through curated materials and flexible configurations. Monitors can be oriented in task-focused or collaborative positions with corresponding grommet solutions for wire management.

Freestanding desks are ideal for larger, flexible applications, while overlay desks create cohesive aesthetics and consistent layouts. Cables are managed through the integrated chase between the overlay desk and storage cabinet or with leg-mounted accessories for freestanding desks.

Continuity in Design

Creating a space that's functional and visually captivating is essential for any workspace. Ligouri simplifies this process through continuous storage and surface spans that are easy to navigate and foster the flow of ideas. This enhances the potential of the private office, providing users the flexibility to optimize their environment in a way that works for them.

Beyond Aesthetics

1 Return Surface Power

Integrated power solutions add flexibility to workspaces. A recessed outlet in the return surface keeps auxiliary technology close and accessible, allowing individuals to connect in the best way possible.

2 Aluminum Shelving & LED Lighting

Solid aluminum shelving, available in a painted or polished finish, and dimmable, inset LED lighting enhance the beauty of spaces while also impacting the well-being and productivity of each user.

3 Worksurface Power

Concealed by a flip-top lid with a scalloped design, integrated power and USB outlets in the worksurface top ensure user technology remains charged and within reach.

4 Wire Chase & Cable Grommets

Preconfigured grommets integrate monitor arms and user technology. Cables travel under the worksurface and into the wire chase for a clutter-free aesthetic. A removable access door allows for easy-access wire management.

5 Recessed Case Panel

A thoughtful approach to cable management keeps plug strips out of sight, allowing the entire case to sit tightly alongside existing office architecture and trim.
